DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37 and 52-73, drawn to flow control device apparatus, classified in class 128, subclass 207.14.
- II. Claims 38-51, drawn to method of regulating, classified in class 128, subclass 200.24.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case instead of having a device that can expand and contract in size you can use a valve to control the flow.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If the applicant decides to elect the flow control device apparatus, the applicant is required to further election one of the following species.

This application contains claims directed to the following patentably distinct species of the claimed invention: Specie A: Figure(s) 5A, 5B, 6A, 6B, 8

Specie B: Figure(s) 9 through 17

Art Unit: 3743

Specie C:	Figure(s) 18
Specie D:	Figure(s) 19 through 21
Specie E:	Figure(s) 22 and 23
Specie F:	Figure(s) 24
Specie G:	Figure(s) 25
Specie H:	Figure(s) 26 and 27
Specie I:	Figure(s) 28
Specie J:	Figure(s) 29
Specie K:	Figure(s) 30
Specie L:	Figure(s) 31
Specie M:	Figure(s) 59 through 65
Specie N:	Figure(s) 66A, 66B, 66C
Specie O:	Figure(s) 67
Specie P:	Figure(s) 68
Specie Q:	Figure(s) 69
Specie R:	Figure(s) 70

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nihir Patel whose telephone number is (571) 272-4803. The examiner can normally be reached on 7:30 to 4:30 every other Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 571-272-4791. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
